

Conatus Late-breaker Oral Presentation at EASL Meeting Details Results of ENCORE-PH Phase 2b Clinical Trial in Patients with NASH Cirrhosis and Severe Portal Hypertension

April 15, 2019

SAN DIEGO, April 15, 2019 (GLOBE NEWSWIRE) -- Conatus Pharmaceuticals Inc. (NASDAQ: CNAT) announced today that the company's late-breaker oral presentation at The International Liver Congress™ 2019, the Annual Meeting of the European Association for the Study of the Liver (EASL) in Vienna, Austria, April 10-14, was also selected by EASL for inclusion in the "Best of ILC" summary slide deck highlighting the most noteworthy contributions to the scientific program at this year's meeting.

The oral presentation at EASL entitled, "Multicenter, Double-blind, Placebo-controlled, Randomized Trial of Emricasan in Subjects with NASH Cirrhosis and Severe Portal Hypertension (PH)," (#LB01) detailed results from the company's Phase 2b ENCORE-PH clinical trial of emricasan, the company's first-in-class, orally active pan-caspase protease inhibitor. Guadalupe Garcia-Tsao, M.D., Professor of Medicine in the Section of Digestive Diseases at Yale School of Medicine, Director of the Clinical and Translational Core at Yale Liver Center, Chief of the Section of Digestive Diseases at the Veterans Administration-Connecticut Health Care System, and the central reader in the ENCORE-PH trial, delivered the presentation on Saturday, April 13, at 4:00 p.m. CEST. A copy of the presentation is available in the Investors section of the Conatus website at www.conatuspharma.com.

About Conatus Pharmaceuticals

Conatus is a biotechnology company focused on the development and commercialization of novel medicines to treat chronic diseases with significant unmet need. In collaboration with Novartis, Conatus is developing its lead in-licensed compound, emricasan, for the treatment of patients with NASH-driven chronic liver diseases. Conatus is independently developing its lead internally developed compound, CTS-2090, for the treatment of patients with chronic diseases involving inflammasome pathways.
